

Amit Vishwakarma

Full-Stack Developer · MERN + Shopify / Headless Commerce

Bengaluru, India (open to remote) | +91 79997 15006 | amit.websitedev@gmail.com

linkedin.com/in/amit-vishwakarma | github.com/AvTe | Available immediately | Comfortable with US/EU overlap

SUMMARY

Full-Stack Developer with 4+ years building production web applications, with 3+ years of MERN stack experience (React, Node.js, Express, MongoDB) and 4 years specializing in Shopify and Headless Commerce (Hydrogen, Storefront API). Designs and ships end-to-end features REST/GraphQL APIs, auth flows, data-sync pipelines, and performant React UIs and has shipped work for international brands across the US, Canada, and Europe. Uses AI-assisted workflows (Claude Code, Copilot, Cursor) to move faster without cutting corners on quality, testing, or accessibility.

EXPERIENCE

Full-Stack Developer — Moshi Moshi, The Communication Company

*Jun 2025 – Present
Bengaluru, India*

- Ship full-stack features across React/Next.js frontends and Node.js/Express APIs with MongoDB — from database schema and endpoint design through to production deploy.
- Build and customize Shopify storefronts using Admin API + Storefront API (GraphQL/REST) and webhook-driven sync between Shopify and external CRM/ERP/marketing platforms for real-time inventory, order, and pricing data.
- Design RESTful APIs with input validation, error handling, and MongoDB query optimization; measurably improved API response times on refactored endpoints.
- Own frontend performance work on live storefronts: reduced LCP/CLS scores and cut page load by roughly a third on multiple client sites through code-splitting, image strategy, and asset optimization.
- Use AI-assisted workflows (Claude Code, GitHub Copilot, Cursor) for code review, refactors, and documentation — deliver in tighter cycles without regressing quality.

Freelance Full-Stack Developer

Feb 2025 – Jun 2025 · Oct 2022 – Jun 2023 - Remote

Independent — Direct Clients & Agencies

- Delivered MERN and Shopify projects for direct clients between full-time roles: custom Shopify theme work, headless storefronts (Next.js + Storefront API), and Node.js/Express backend APIs with MongoDB.
- Handled complete project lifecycle — scoping, estimates, delivery, revisions, and handoff — for repeat clients based in the US and Europe.
- Used the time between engagements to ship personal open-source tools (Chrome / VS Code extensions, listed under Projects) and go deeper on Shopify Hydrogen, AWS, and headless architecture.

Frontend / Full-Stack Developer — Stellar8 Labs

*Mar 2024 – Feb 2025
Remote – Indore, India*

- Built full-stack features with React/Next.js on the frontend and Node.js APIs backed by MongoDB, including secure auth flows (JWT and session-based).
- Integrated frontend with REST and GraphQL APIs; built reusable component libraries used across multiple product areas.

- Ran accessibility audits (WCAG) and cross-browser QA; contributed to a measurable reduction in accessibility issues at release.
- Refactored legacy components into a modular architecture, cutting duplicate code and improving maintainability across the team.

Web Developer / Website Designer — GrayCyan

*Jun 2023 – Feb 2024
Remote – Ontario, Canada*

- Built WordPress block themes and responsive marketing sites from UI/UX wireframes, working directly with the Canadian design team across time zones.
- Implemented a scalable CSS architecture using BEM + SCSS; shipped pixel-perfect layouts across mobile, tablet, and desktop.
- Collaborated on multi-project delivery via Git workflows; maintained code quality across simultaneous client engagements.

Web Developer — Dime In Time Media LLC

*Sep 2021 – Oct 2022
Bhopal, India*

- Built responsive, conversion-focused websites for US-based clients using JavaScript, WordPress, and WooCommerce.
- Delivered WooCommerce customizations — checkout, product templates, plugin integrations — and improved site performance on delivered projects.

SELECTED PROJECTS

Yoombaa — MERN Full-Stack Platform, Live · yoombaa.com

Live MERN platform: React + Node.js + Express + MongoDB, with a shipped React Native mobile app in production. Owned schema design, REST API layer, auth flow, frontend build, and cross-platform mobile.

SellFlow — Founder & Full-Stack Developer, Live · sellflow.bio

SellFlow is the free social commerce platform for creators. Sell products on Instagram, TikTok, and YouTube — no website, no payment gateway needed. Just a link in bio.

Shopify Agency Work (via Moshi Moshi)

Theme customization and Storefront API integration work delivered for international brands including Allbirds, Everlane, and Filson as part of the Moshi Moshi agency team. Contributions focused on product/collection pages, GraphQL-driven data rendering, and Core Web Vitals improvements.

RefineAI — Chrome Extension · [Chrome Web Store](#)

Manifest V3 Chrome extension with AI-powered writing features. Supabase backend with RLS, Lemon Squeezy billing, HMAC-verified webhooks, server-side quota enforcement.

CleanCompress — Chrome Extension · [Chrome Web Store](#)

Published Chrome extension for compressing and cleaning up images directly in the browser.

DevStock & GitAxis — VS Code Extensions · github.com/AvTe/GitAxis

Two published VS Code extensions for the marketplace — DevStock (developer productivity) and GitAxis (Git workflow enhancement).

Headless WordPress with Next.js · github.com/AvTe/Headless-WordPress-with-Nextjs

Reference implementation: WordPress as a headless CMS with a Next.js frontend consuming the WP REST API.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, SCSS

Frontend: React, Next.js, React Native (iOS + Android), Redux, TailwindCSS, Material UI, Bootstrap, Vite, Framer Motion, GSAP

Backend: Node.js, Express.js, REST APIs, GraphQL, WebSockets, JWT / session auth, Webhooks

Databases: MongoDB (Mongoose), PostgreSQL, Redis

Commerce: Shopify Plus, Shopify Liquid, Shopify Hydrogen, Storefront API, Admin API, WooCommerce, WordPress

Cloud & DevOps: AWS (EC2, S3, IAM, CloudWatch), Nginx, Linux, PM2, Git, GitHub, CI/CD basics

Testing & Quality: Jest, cross-browser QA, WCAG accessibility, Core Web Vitals optimization

AI-Assisted Workflow: Claude Code, GitHub Copilot, Cursor, ChatGPT — for code review, refactors, docs

Design Tools: Figma, Adobe XD

HIGHLIGHTS

- Delivered 30+ Shopify and 15+ MERN/full-stack applications for international clients across US, Canada, and Europe.
- Hands-on experience with Shopify Hydrogen and headless commerce architecture — an uncommon skillset in the wider MERN talent pool.
- Ships end-to-end: schema design → API → frontend → deploy → performance tuning.
- Comfortable with remote-first, async communication and overlap with US/EU business hours.
